OKLAHOMA ASSETS

HOME

Creating Pathways To Stronger Financial Futures. For All Oklahomans.

The mission of Oklahoma Assets is to advocate policies and programs that can help create a more inclusive economy – one in which financial success, economic stability, and opportunity is available, not just for some, but for all.

Make A New Start. Starting Right Here. [\[button linking to page with form field\]](#)

Oklahoma Assets' programs can help you get on, and stay on, the pathway to a more independent future for you and your family.

- Matched Savings Account Programs
- College Savings Programs
- Homeownership Programs
- Small Business Development Programs
- Job Training Programs

You can do this. Start right here, right now.

ABOUT

Our Vision & Purpose

Oklahoma Assets:
Building financial foundations, opening the doors of opportunity.

Oklahoma Assets is a statewide alliance of committed individuals working together to promote and expand economic opportunity to all Oklahomans, but especially to those individuals and families with low-income and low-wealth.

Oklahoma Assets recognizes and admires the desire of middle and low-income people to become savers, investors, homeowners, entrepreneurs, and to pursue higher education.

We believe that with the right support, the right tools, and a measure of hope, they have the capability to achieve these goals. And when they can, our state's economy and our society as a whole will reap the rich rewards.

Economic opportunity. It should be available to all Oklahomans regardless of income. And by promoting policies and programs that foster financial success and economic stability, Oklahoma Assets is working to ensure that it will be.

Our History

The work of Oklahoma Assets builds upon the efforts of the Oklahoma Native Assets Coalition (ONAC) to develop asset-building practices, such as financial education, home ownership, access to higher education, and access to financial services, within the Native American communities.

As ONAC's asset-building programs and initiatives were developed, it became evident that no mechanism was available within the state to network, collaborate and support others doing similar work within Native and other communities in Oklahoma.

Oklahoma Assets was officially established in early 2008 and began its work by identifying asset-building programs and potential policies for future initiatives. A series of "listening sessions" made up of a diverse cross section of like-minded organizations across the state were organized in 2009 to gather input and invite fresh thinking about asset-building opportunities. From these sessions came validation of a broad interest in asset-building programs and policies, and recognition of the need for a well organized statewide coalition to help further them.

Shortly after, Oklahoma Assets worked with the Oklahoma Department of Commerce and the Oklahoma Association of Community Action Agencies to update the *Oklahoma Self-Sufficiency Standard*, a key resource for asset-building programs that details the amount of income needed for families to be financially self-sufficient in Oklahoma.

Out of this work came the valuable support of the Ford Foundation and the First Nations Development Institute.

Now, after only a few short years, Oklahoma Assets continues to build momentum as an organization, helping to shape public policies, expand asset-building initiatives, and broaden its growing membership.

Our Team

The members of Oklahoma Assets' Board of Directors include experienced and committed volunteers from a broad range of professions and fields, including non-profit and for-profit organizations, government agencies, American Indian Nations, and social intermediary organizations.

David Blatt Ph.D – Director

David, founder and director of the non-profit Oklahoma Policy Institute, previously served as Director of Public Policy for the Community Action Project of Tulsa County and as a budget analyst for the Oklahoma State Senate. He is recognized as one of Oklahoma's leading experts on fiscal policy.

AUTRY TECH CENTER

HOME PAGE

Goals. We all have them, or want them. But whether *your* goal is to find and train for a new career or to sharpen your professional skills, *our* goal at Autry Technology Center is to help you reach a new level of success.

Autry Technology Center began helping students achieve their career goals in 1967, as one of Oklahoma's five original vocational-technical schools. Now, as we enter a new century, our center has grown to serve over 6,500 area residents each year in a wide range of areas.

Technical education in the United States continues to grow at a rapid rate. More than ever before, employers are requiring a high level of technical training in their new hires. Autry Tech is helping our students keep pace.

The programs at Autry Technology Center have been developed to meet the demands of today's employers and are constantly being revised and updated to meet the changing needs of our student body.

Autry Tech's 25 Full-Time programs offer state-of-the-art training in careers of the future. Programs are offered for high school juniors, seniors and adult students. College credit is available in most programs.

300 Short-Term classes are offered each year. This wide, and ever-changing, array of course topics meets the needs of those who are training for new careers and those who are learning for fun.

Autry Tech's Business and Industry Services aid economic growth and strengthen area businesses by providing customized training and services.

Our dedicated, professional faculty is fully committed to providing our students an academic and technical education that prepares them for future employment and/or further education.

Autry Technology Center is accredited by the Oklahoma State Department of Vocational-Technical Education, the Oklahoma State Department of Education and the North Central Association of Colleges and Schools.

Autry Technology Center offers courses of study that can set you on course to a new career or a new learning experience. But for those who are still formulating their goals, Autry Tech counselors can provide valuable guidance and direction.

So, whether you've decided on a career direction or are still searching, Autry Technology Center can provide you with learning opportunities that will fit your needs and your lifestyle.

At Autry Technology Center, our goal is to help you reach your goal.

COURSES AND ENROLLMENT

Short-Term Courses Autry Technology Center offers a variety of short-term day and evening courses as well as special seminars to assist with career preparation, job advancement, and personal development. Certification programs which meet state and federal requirements from pre-licensing to continuing education are also offered.

(Short-term course database [here](#).)

FULL-TIME COURSES

AUTOMOTIVE TECHNOLOGY

With the increasing complexity of automotive design, skilled automotive technicians will always be in demand. Autry Tech's performance-based program will help you acquire the skills you need to get a job in this rewarding field.

JOB OUTLOOK:"Employment is expected to increase in the Automotive Service field. Opportunities should be best for those who complete formal automotive technician training programs." Source: US Department of Labor

AIR CONDITIONING AND REFRIGERATION

Upon completion of this program, you'll be ready to begin a challenging career in the growing field of air-conditioning and refrigeration. At Autry Tech you will learn to work with a variety of refrigeration units and climate control systems ranging from the sophisticated, computer-monitored energy management systems to standard heat, refrigeration and air units.

JOB OUTLOOK: "Job opportunities for A/C and Refrigeration technicians are expected to be very good, particularly for those with Technical School training." Source: US Department of Labor

SURGICAL TECHNOLOGY

As a Surgical Technologist you will work as a member of the surgical team assisting medical staff to deliver direct patient care before, during and after surgery.

Autry Tech's comprehensive program will help you acquire the skills needed to work in this interesting and important profession.

JOB OUTLOOK: "Job opportunities are expected to increase due to an aging, growing, population and technological advances that will increase the number of surgical procedures performed." Source: US Department of Labor

RADIOGRAPHY (X-RAY)

Upon completion of Autry Tech's Radiography course you will have the knowledge and skill needed to perform quality radiographic examinations safely and accurately in a variety of medical settings.

JOB OUTLOOK: "Job opportunities will continue to increase in availability in hospitals, doctor's offices, free-standing imaging centers and specialized clinics."

ELECTRONICS

Rapidly changing computer and electronic technologies indicate that the field of electronics will continue to be one of the most exciting career choices for the 21st Century; perhaps electronics is the professional area you've been searching for.

JOB OUTLOOK: "Exciting changes are occurring in the field of Electronics. The increasing computerization and automation in our nation's industries will drive employment growth." Source: US Department of Labor

GRAPHIC ARTS

Upon completion of the Graphic Arts Program you will have a working knowledge of the basic skills and techniques used in the graphic arts industry from computer design and layout to film preparation and press operation.

JOB OUTLOOK: "The graphic arts/printing industry is highly lucrative, high-demand field. Even in a highly computerized world the need for printing is only increasing."

POWER PRODUCTS TECHNOLOGY

As a Power Products Technician, you will have the basic skills to maintain, test and repair all types of small two and four-cycle internal combustion engines such as lawn and garden equipment, motorcycles, outboard motors and chain saws. Your training will prepare you for diverse job opportunities which include the possibility of self employment.
